Genito Urinary Cancer Care

28, 29, 30, 31 March and 1 April 2011
15 credits at Level 6 or 7
£795

‘All patients with urological cancers should be managed by multidisciplinary urological cancer teams’. (NICE 2002). This five day module, open to Nurses and Allied Health Professionals, will provide students with the opportunity to develop the knowledge to further improve the care and outcomes for patients undergoing treatment for a genito-urinary cancer. The module aims to give healthcare professionals relevant and up to date knowledge to enable them to critically analyse current practice in this clinical speciality and, in turn, provide safe, effective and evidence based care for patients with genito-urinary cancers.

To apply or to find out more information on this module and the range of other courses we offer at The School of Cancer Nursing and Rehabilitation, please contact us on 020 7808 2900 or by e-mail at school@rmh.nhs.uk
