The Royal Marsden
School of Cancer Nursing and Rehabilitation

We offer a wide range of programmes and stand alone modules aimed at health care professionals dedicated to cancer care including:

Radiotherapy in Cancer Care
27, 28, 29, 30 June and 1 July 2011
15 credits at Level 5 or 6
£795
This module has been designed to meet the needs of nurses and allied health professionals working within the cancer care setting who regularly care for patients undergoing treatment procedures involving radiation. It provides an opportunity for health care professionals to develop their skills in assessing, planning, implementing and evaluating care for cancer patients undergoing radiotherapy, brachytherapy and radioisotope treatments.

Palliative Care in Cancer
20, 21, 22, 25 and 26 July 2011
15 credits at Level 6 or 7
£795
This module will provide students with the knowledge and skills required to care for patients with cancer related palliative care needs in any clinical setting, exploring key concepts and issues in palliative care and relating these to clinical practice. It will examine the assessment of a patient’s palliative care needs and symptoms, and consider appropriate interventions based on available evidence. The delivery of palliative care services and implications of recent policy on future ways of working will also be explored.

To apply or to find out more information on these module and the range of other courses we offer at The School of Cancer Nursing and Rehabilitation, please contact us on 020 7808 2900 or by e-mail at school@rmh.nhs.uk
