The Royal Marsden School of Cancer Nursing and Rehabilitation

Prospectus for academic year commencing Sept 2010

The new prospectus of The Royal Marsden School of Cancer Nursing and Rehabilitation is now available. The Royal Marsden is a special place to study with cancer specific education by those involved in giving care on a regular basis. The modules and programmes have been updated over the last year. The majority of our programmes will have been validated by Kingston / St George’s, University of London.

If you passion is caring for individuals with cancer, we are the place to come for education and support. We provide education in cancer care, not just a qualification

Courses in the School of Cancer Nursing and Rehabilitation

Clinical Leadership in Cancer Care
Duration: 5 days
Dates: 19 & 26 November, and 3, 10 & 17 December 2010
Credits: 15 credits at level 6 (degree)
Course Summary: Clinical leadership has emerged as one of the most important components in order to achieve world class cancer care within the UK (Darzi, 2009). This module will enable students to develop the knowledge and skills required to promote and develop their role as healthcare professionals.

The aim of this module is to provide students with a comprehensive understanding of current theory and practice with regard to leadership in cancer care, and enable students to apply this understanding in order to promote the advancement of initiatives relevant to their practice.

Foundations in Cancer Care
Duration: 5 days
Dates: 1, 2, 3, 4 and 5 November 2010
Credits: 15 credits at level 5 (diploma)
Course Summary: All healthcare professionals working in cancer care should have sufficient knowledge and skills to ensure they are both confident and competent in dealing with people affected by cancer (Department of Health, 2007). This module is designed to introduce all healthcare professionals to cancer as a disease, focusing on the aetiology, biology and pathophysiology, together with an overview of treatment modalities. It is intended to provide the essential building blocks upon which specialised cancer knowledge can be built.

The module aims to enhance the student’s knowledge of cancer and its treatments.

Acute Cancer Care
Duration: 6 days
Dates: 14, 21 & 28 October, 4, 11 & 18 November 2010
Credits: 15 credits at level 5 (diploma) level 6 (degree)
Course Summary: With the move towards community based cancer care (DOH, 2007) and the advances in cancer treatment the nature of admissions for inpatient care has become ever more acute. This module aims to equip the student with an understanding of how cancer and its treatment can lead to the acute deterioration of the patient and how to assess and manage the rapidly changing situation.

This module aims to allow students to gain an understanding of how cancer and its treatment can lead to the patient becoming acutely ill. To ensure when looking after the acutely ill cancer patient the student has the knowledge to confidently care for them and their significant others.
