Cancer and the Family
18, 25, 28 November, 2 and 5 December 2011
15 credits at Level 7
£825

The course is suitable for senior nurses, clinical nurse specialists and allied health professionals working directly with adult cancer patients with dependent children (under 18 years) and particularly those interested in enhancing their clinical competence and confidence supporting parents with cancer. The module has been designed to enable students to develop an understanding of systemic family theory and developmental psychology. Particular attention will be given to the impact of illness on children and the family along the illness trajectory and children’s understanding of illness in accordance with their age and developmental stage.

To apply or to find out more information on these modules and the range of other courses we offer at The School of Cancer Nursing and Rehabilitation, please contact us on 020 7808 2900 or by e-mail at school@rmh.nhs.uk

REHABILITATION

Lymphoedema in Cancer Care
7, 8, 9, 14 and 15 November 2011 (blended learning module also available)
15 credits at Level 6
£825

This module allows students to gain a deeper insight into the causes and management of this chronic condition. In addition to exploring the evidence base for the care of cancer related lymphoedema, the module provides an opportunity to learn and practice the practical skills of compression bandaging.
