McGraw-Hill Education keeps up with the constantly changing demands of medical education, which is especially relevant given the statistics involving the use of technology by physicians and medical students:

- 50% of physicians use Wikipedia as their main source of information when treating patients¹
- 81% of students use mobile devices to study (up 40% since 2013)²
- 62% of students say that technology helps them feel better prepared for classes²

It’s clear that physicians and students thrive on new educational technologies. McGraw-Hill Education’s Online Medical Solutions allow them to access multiple quick reference and self-assessment tools, as well as a vast multimedia library.

McGraw-Hill Medical’s Access Solutions

Your user community can search across all your Access subscriptions using our McGraw-Hill Medical page (mhmedical.com) or personalize their experience using their free MyAccess account. Our Access online solutions are updated on a regular basis and feature a fully integrated drug database including pharmacokinetics, pricing, indications, and contraindications; offer a curriculum/training workflow tool; and have external OpenURL-enabled links to primary literature via PubMed.

The Access platform uses responsive design for a great mobile viewing experience.
**Access Anesthesiology**

- Residents and students can strengthen their skills with procedural videos, Q&A, and leading textbooks that establish a solid base for learning.
- Practicing anesthesiologists are provided with everything they need to reinforce their medical knowledge for recertification in anesthesiology.
- A collection of the most prominent anesthesiology texts, including:
  - Anesthesiology
  - Morgan & Mikhail’s Clinical Anesthesiology
  - NYSORA Textbook of Regional Anesthesiology and Acute Pain Management

accessanesthesiology.com
